

For applications requiring the creation of an original CD / DVD R image file and multiple CD / DVD R discs simultaneously, Condre offers the DVD Tracer PC Series, a PC connect authoring and duplication system. Featuring the powerful and intuitive RECORDNOW-MAX software and high performance DVD R writers, the DVD Tracer PC Series is perfectly suited for SOHO, SMB and even Corporate environments. The tower systems include a SCSI interface, allowing users to expand their configurations with additional slave systems for increased throughput as applications demand. Industrial grade enclosures and power supplies assure the long term reliability of the system. In addition, the software provides users with a variety of functions including disc to disc copy, DVD Video or Video CD creation, audio extraction and MP3 or .wav file support, creation of Global Images, and more. Most importantly, the DVD Tracer PC Series is priced to fit most any Mid Range or Prosumer application !
